

712CD

75TH MORSS CD Cover Page

If you would like your presentation included in the 75th MORSS Final Report CD it must :

1. Be unclassified, approved for public release, distribution unlimited, and is exempt from U.S. export licensing and other export approvals including the International Traffic in Arms Regulations (22CFR120 et seq.);
2. Include MORS Form 712CD as the first page of the presentation;
3. Have an approved MORS form 712 A/B and
4. Be turned into the MORS office no later than: **DEADLINE: 14 June 2007 (Late submissions will not be included.)**

Author Request (To be completed by applicant) - The following author(s) request authority to disclose the following presentation in the MORSS Final Report, for inclusion on the MORSS CD and/or posting on the MORS web site.

Name of Principal Author and all other author(s):

Dwayne T Hill
Erika Chan
Mitchell Woods

Principal Author's Organization and address:

US Army Test and Evaluation Command (ATEC)
4501 Ford Avenue, suite 790
Alexandria, VA 22302-1458

Phone: (703) 681-2749

Fax: (703) 681-6914

Email: Dwayne.thomas.hill@atec.army.mil

Please use the same title listed on the 75TH MORSS Disclosure Form 712 A/B. If the title of the presentation has changed please list both.)

Original title on 712 A/B: Net-Enabled Battle Command: System-of-System Test and Evaluation Concept

If the title was revised please list the original title above and the revised title here:

Original Title: Net-Enabled Battle Command: System-of-System Test and Evaluation Concept
Revised Title: WG06HillDwayne_2007May31.ppt

Net-Enabled Battle Command Network Overview

Networked systems provide data/information from and to sensors, software, computers, telecommunications, and decision-makers

UNCLASSIFIED

ARMY TEST AND EVALUATION COMMAND

UNCLASSIFIED

Net-Enabled Battle Command

Some Definitions

- **Command Net:** A communications network which connects an echelon of command with some or all it's subordinate echelons for the purpose of command and control. (*Ref: FM 1.02*)
- For the Net-Enabled Battle Command concept, we assume that all of the various systems/components of the network already meet the NR-KPP requirements, as called for by the Chairman Joint Chiefs of Staff Instruction (CJCSI) 6212.01D.

UNCLASSIFIED

6

ARMY TEST AND EVALUATION COMMAND

UNCLASSIFIED

Net-Enabled Battle Command

Net-Centric Assumptions

- The Joint-described tenets of Network-Centric Warfare is that networked forces will demonstrate:
 - Improved speed of command;
 - An improved ability to rapidly synchronize among themselves;
 - An improved ability to collect, process, and disseminate an uninterrupted flow of information; and
 - An improved ability to change over time.
- Systems are Net-Ready compliant

UNCLASSIFIED

Net-Enabled Battle Command Domains

Mission – Domain where the net-enabled force/unit demonstrates the degree to which it is able to achieve the defined future force concepts/capabilities

Cognitive – Domain where decisions are made by the decision-maker; the place where perceptions, beliefs, values, understanding, and assessments takes place

Information – Domain where relevant information is created, manipulated, processed, stored, shared and presented to the decision - maker to convey commander's intent and enable situational awareness

Physical – Domain where the components of the network reside; sensor, platform, applications, operating systems, standards and transport infrastructure

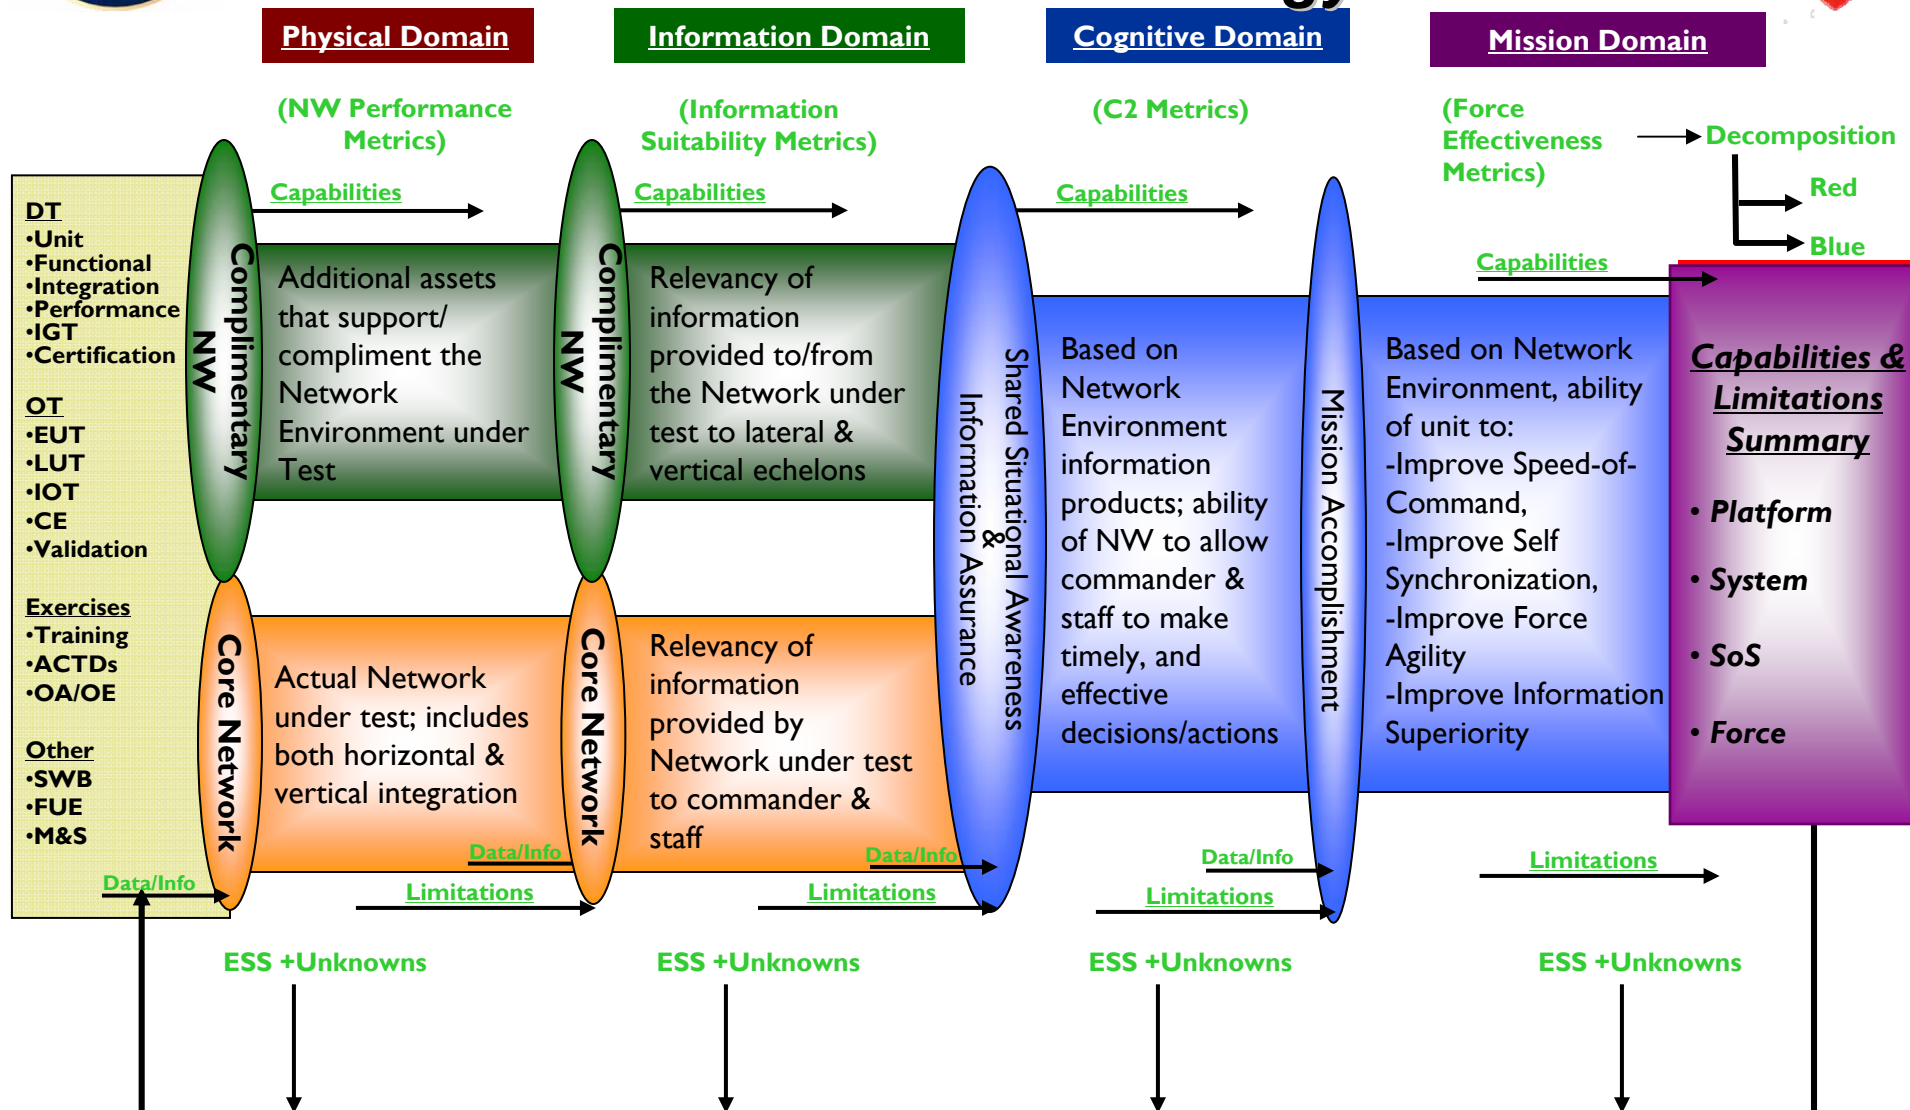

UNCLASSIFIED

Net –Enabled Battle Command

Overall T&E Methodology

IGT - Independent Government Test; EUT – Early User Test; LUT – Limited User Test; IOT – Initial Operational Test; CE – Continuous Evaluation; ACTD – Advanced Concept Technology Demonstration; OA/OE – Operational Assessment/Operational Evaluation; SWB – Software Blocking; FUE – First Unit Equipped; M&S – Modeling and Simulation; ESS – Effectiveness, Suitability, Survivability; NW – Network; C2 – Command and Control; FoS – Family of Systems; SoS – System of Systems

Speed-of-Command

UNCLASSIFIED

16

ARMY TEST AND EVALUATION COMMAND

UNCLASSIFIED

Net-Enabled Battle Command Mission Methodology

Speed of “Firsts”

Speed of Command, described by the OODA Loop, assesses the rapidity which you go from 1 – 4

In addition, each component of the OODA loop, O-O-D-A, assesses the time to complete each individual “first”

Assessments based on:

- JIM forces vs. Threat
- System maturity comparison (roi)

1. See First

2. Understand First

3. Decide First

4. Act First

5. Finish Decisively

Assessments based on:

- Mission success
- Commander’s intent
- Task/mission requirements

“Did I impose my will on the enemy”

Quality of “Firsts”

Information Superiority

Self-Synchronization

Force Agility

Assessments based on:

- JIM forces vs. Threat
- System maturity comparison (roi)

Battle Command Information Need Categories:

JIM forces status, Threat status, Terrain information, Weather information

ARMY TEST AND EVALUATION COMMAND

UNCLASSIFIED

NEBC Activity Model (OV-5)

UNCLASSIFIED

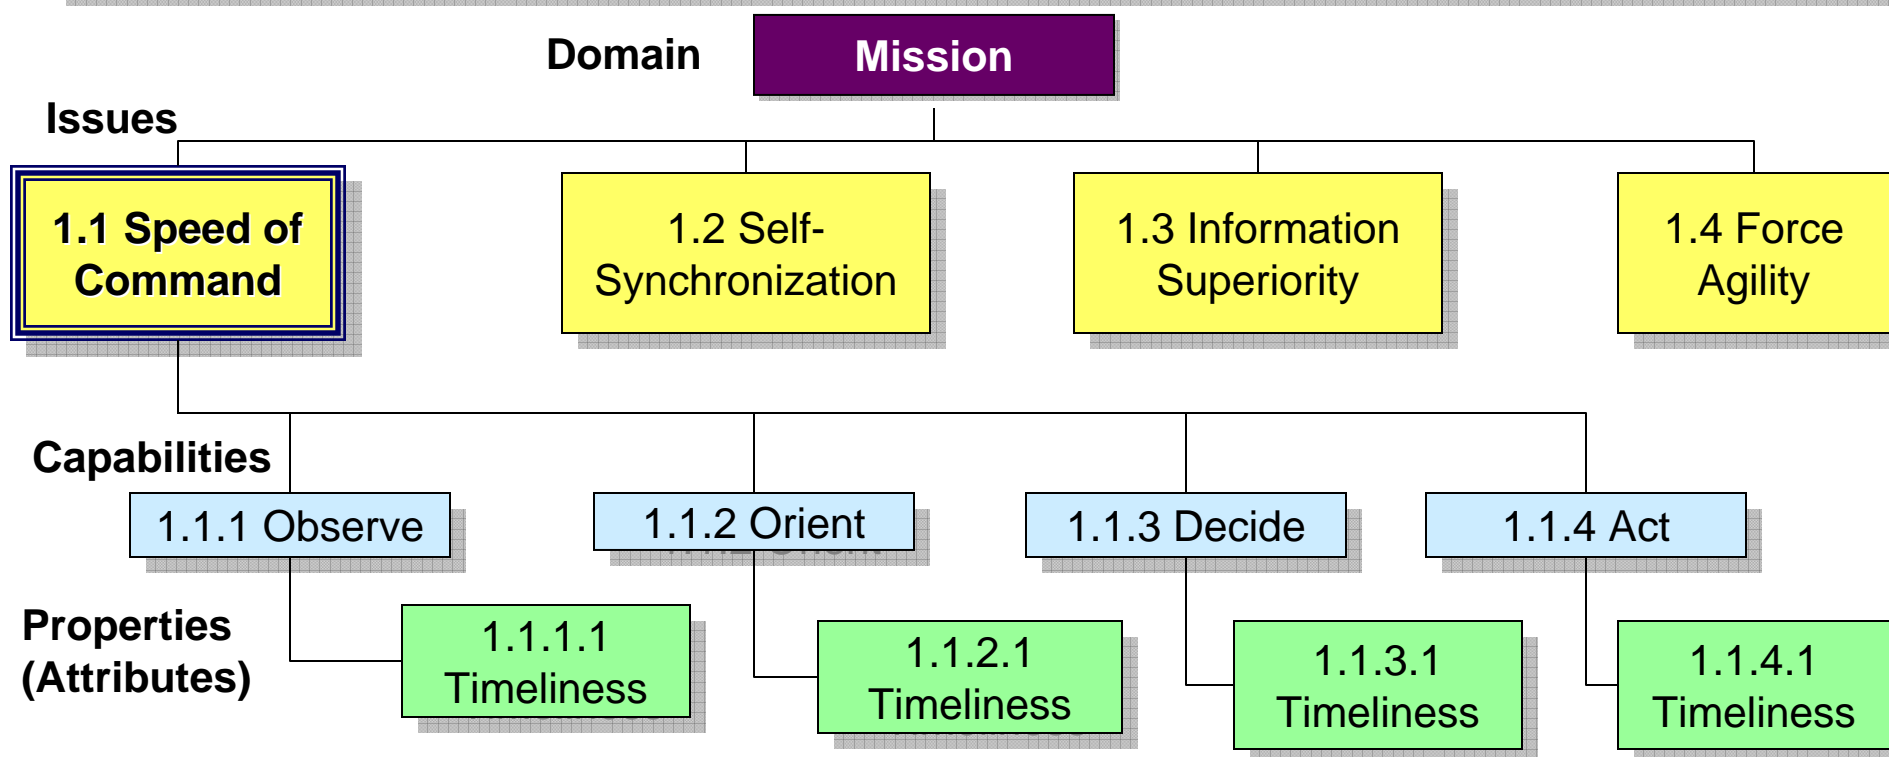

Objective of Mission Domain:

Demonstrated ability of net-enabled forces to achieve some degree of future force capability

Definition of Speed of Command:

- ❖ Time required to complete one full cycle of Boyd's observe-orient-decide-act (OODA) loop
(Ref: *Network-Centric Warfare – Its Nature and Modeling*, Fewell, M.P and Hazen, Mark G.)

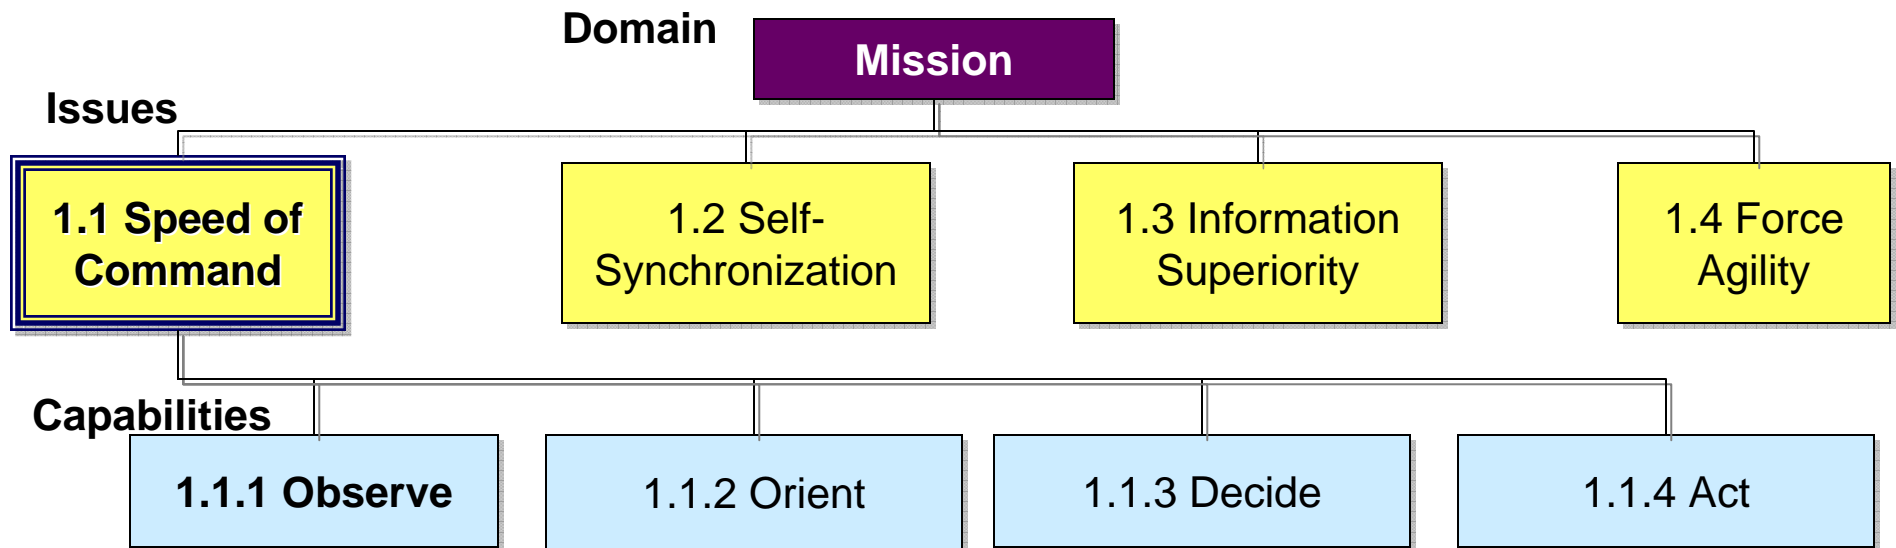

UNCLASSIFIED

19

Objective of Mission Domain:

Demonstrated ability of net-enabled forces to achieve some degree of future force capability

Definition of Observe:

- ❖ The act of (*time to*) collecting information. Sometimes the commander actively seeks information; sometimes the command and control (C2) system disseminates it to them. (Ref: FM 6-0)
- ❖ (*Time*) To learn about the status of their forces, the environment and the enemy through intelligence, surveillance, reconnaissance, information systems and reports from other headquarters (Ref: FM 6-0)
- ❖ An act (*Time*) to discern a target visible to a sensor (human or machine) that may be within range of available weapons. (Ref: FM1-02, see definition for Target of Opportunity)

UNCLASSIFIED

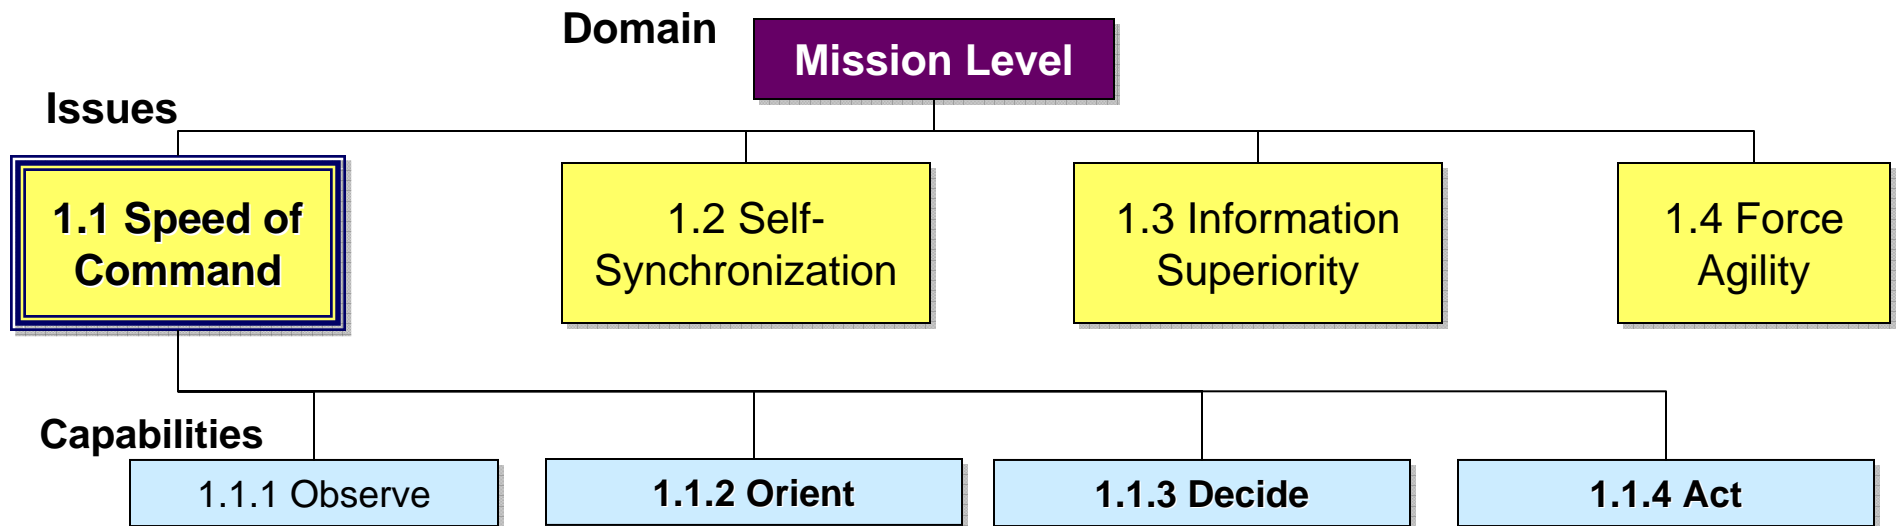

20

ARMY TEST AND EVALUATION COMMAND

Objective of Mission Domain:

Demonstrated ability of net-enabled forces to achieve some degree of future force capability

Definition of Orient:

How (long to become) familiar with or adjusted to facts, principles, or a situation *is the force* (Ref: *Freedictionary. com*)

Definition of Decide:

Timeliness of selecting a course of action as the most favorable to accomplish the mission (Ref: *FM 6-0, FM 1-02*)

Definition of Act:

Time to put decisions into action by disseminating it through execution information – orders or plans; supervising to ensure proper execution and assessing results through feedback from COP and staff running estimates; synchronize and integrate BOS as well as directing execution within the higher commander's intent. (Ref: *FM 6-0*)

UNCLASSIFIED

Self-Synchronization

UNCLASSIFIED

22

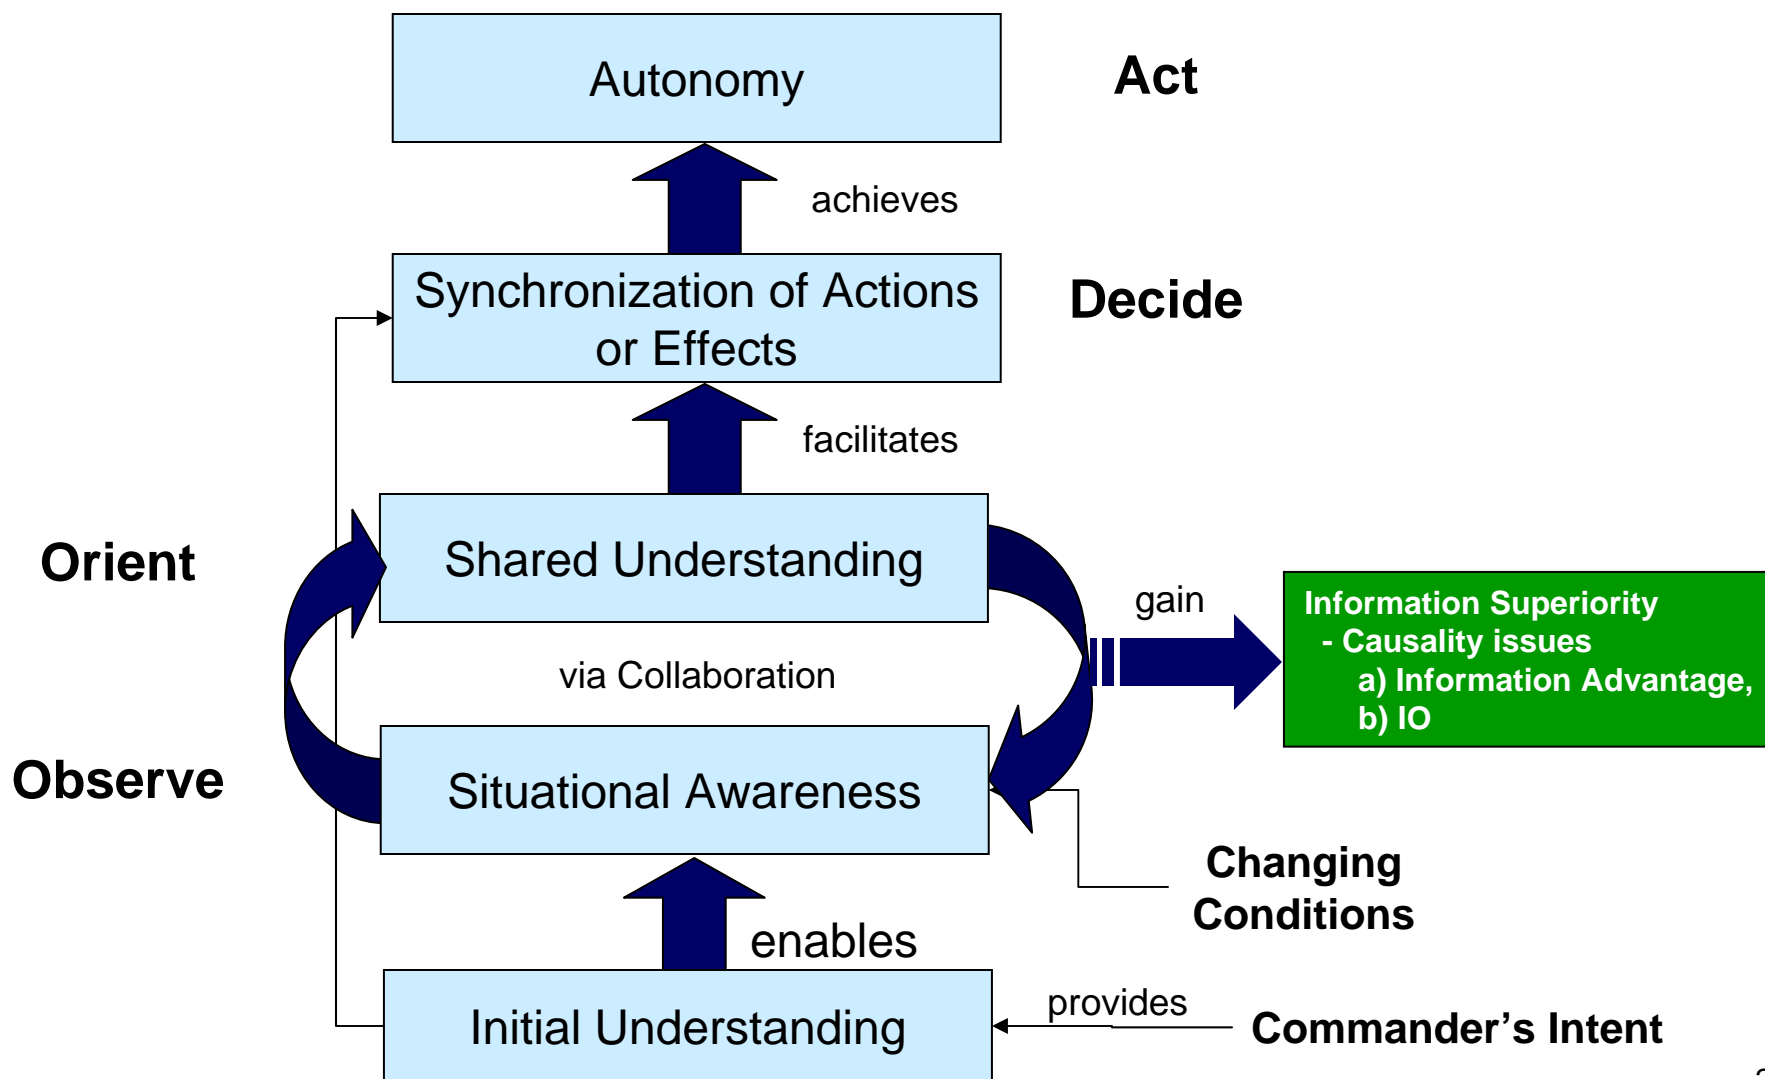

ARMY TEST AND EVALUATION COMMAND

UNCLASSIFIED

Self Synchronization

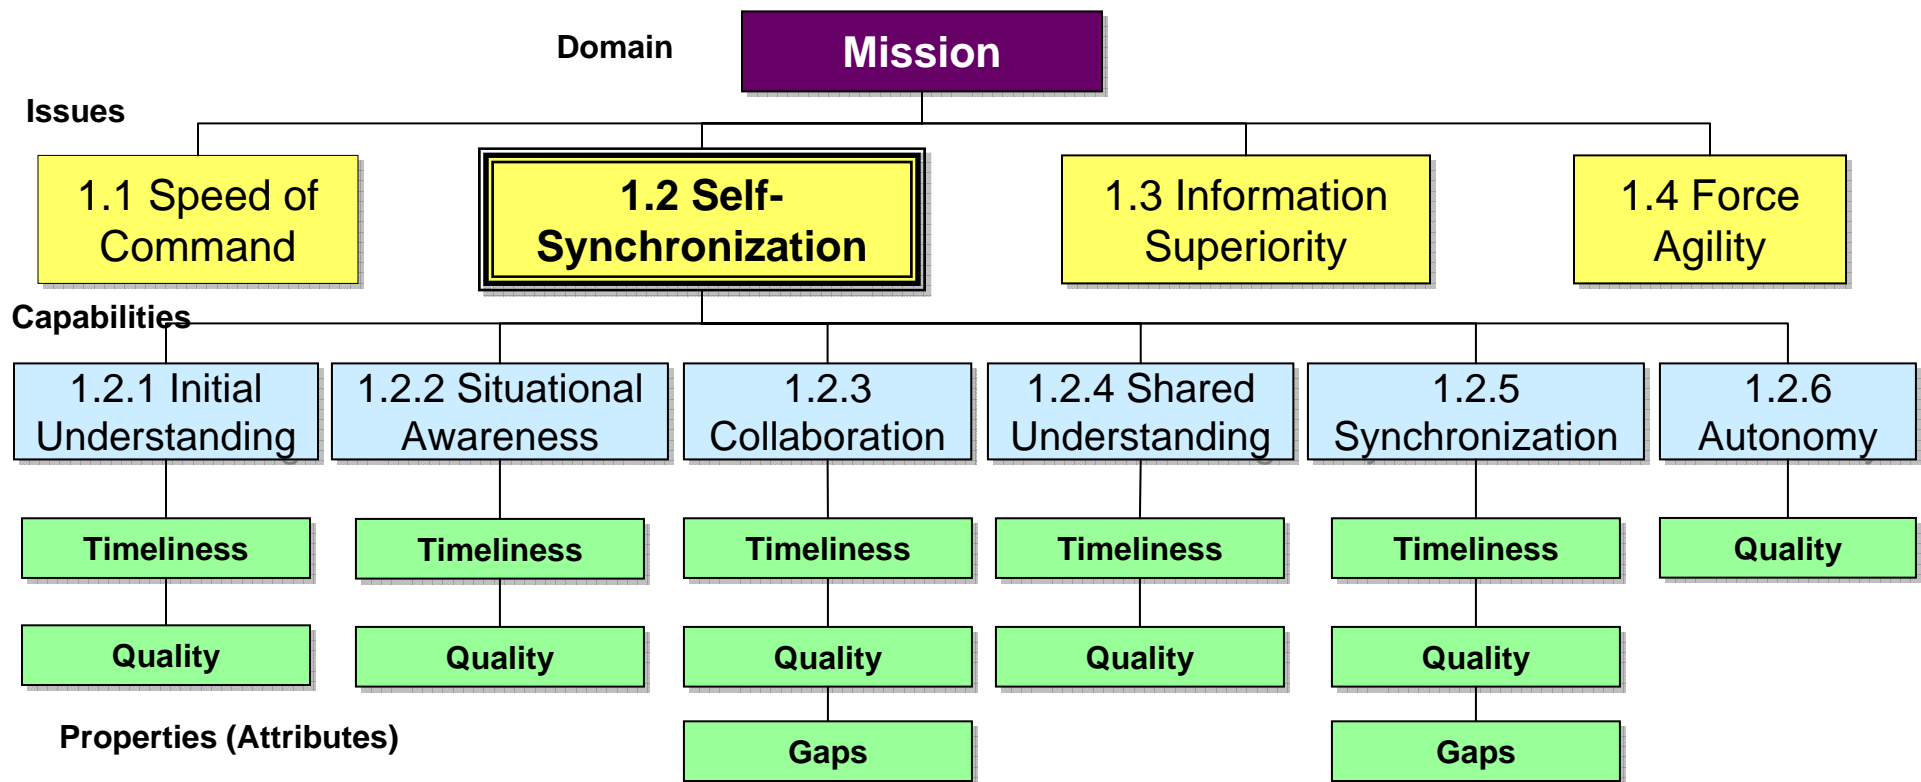

Objective of Mission Domain:

Demonstrated ability of net-enabled forces to achieve some degree of future force capability

Definition of Self-Synchronization:

❖ Ability of entities to rapidly synchronize among themselves, independent of direction from superiors (Ref: *Network-Centric Warfare – Its Nature and Modeling*, Fewell, M.P and Hazen, Mark G.)

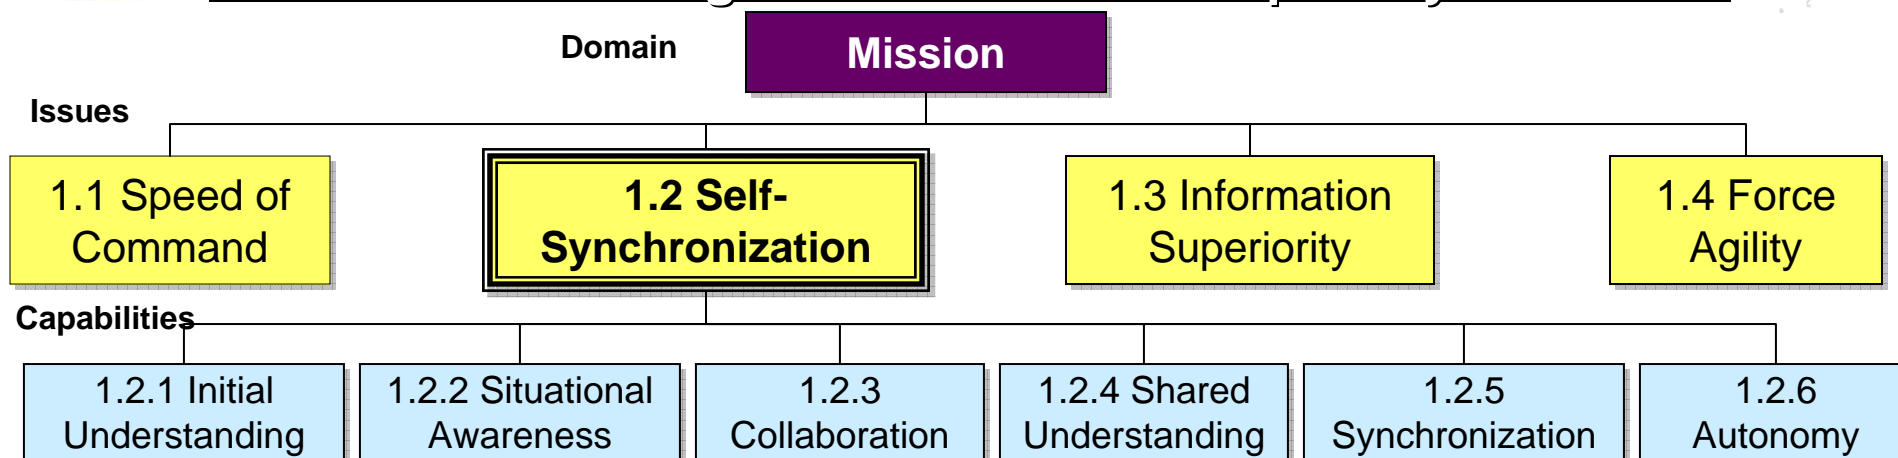

UNCLASSIFIED

Objective of Mission Domain:

Demonstrated ability of net-enabled forces to achieve some degree of future force capability

Definition of Initial Understanding:

- ❖ *Time for and degree that all subordinate commands have higher commander's plan(s) and intent?*

Definition of Situational Awareness:

- ❖ *Time for knowing who's where and what are they doing? (Ref: JFC)*
- ❖ *The quality of perception of relevant elements in the environment, the comprehension of their meaning and the projection of their status in the near future. (Ref: Endsley)*

Definition of Collaborate:

- ❖ *Given the network, how well can subordinate entities work together to plan and execute missions and tasks?*

Definition of Shared Understanding:

- ❖ *Time for subordinate commands to gain and the quality of common understanding of a situation*

UNCLASSIFIED

25

ARMY TEST AND EVALUATION COMMAND

Objective of Mission Domain:

Demonstrated ability of net-enabled forces to achieve some degree of future force capability

Definition of Synchronization:

- ❖ The *time required* to arrange military actions in time, space and purpose to produce *maximum (precise)* relative combat power at a decisive place and time. (Ref: FM 3-0)
- ❖ *Time to* arrange military actions by forces and BOS in time, space and purpose to produce maximum *(precise)* relative military power at a decisive place and time. (Ref: FM 6-0)

Definition of Autonomy:

- ❖ Successfully conducting military operations through decentralized execution based on mission orders for effective mission accomplishment (Quality)
 - ❖ Degree of independency in making decisions
 - ❖ *Success of conduct(ing)* military operations through decentralized execution based on mission orders for effective mission accomplishment.

UNCLASSIFIED

UNCLASSIFIED

Information Superiority

UNCLASSIFIED

27

ARMY TEST AND EVALUATION COMMAND

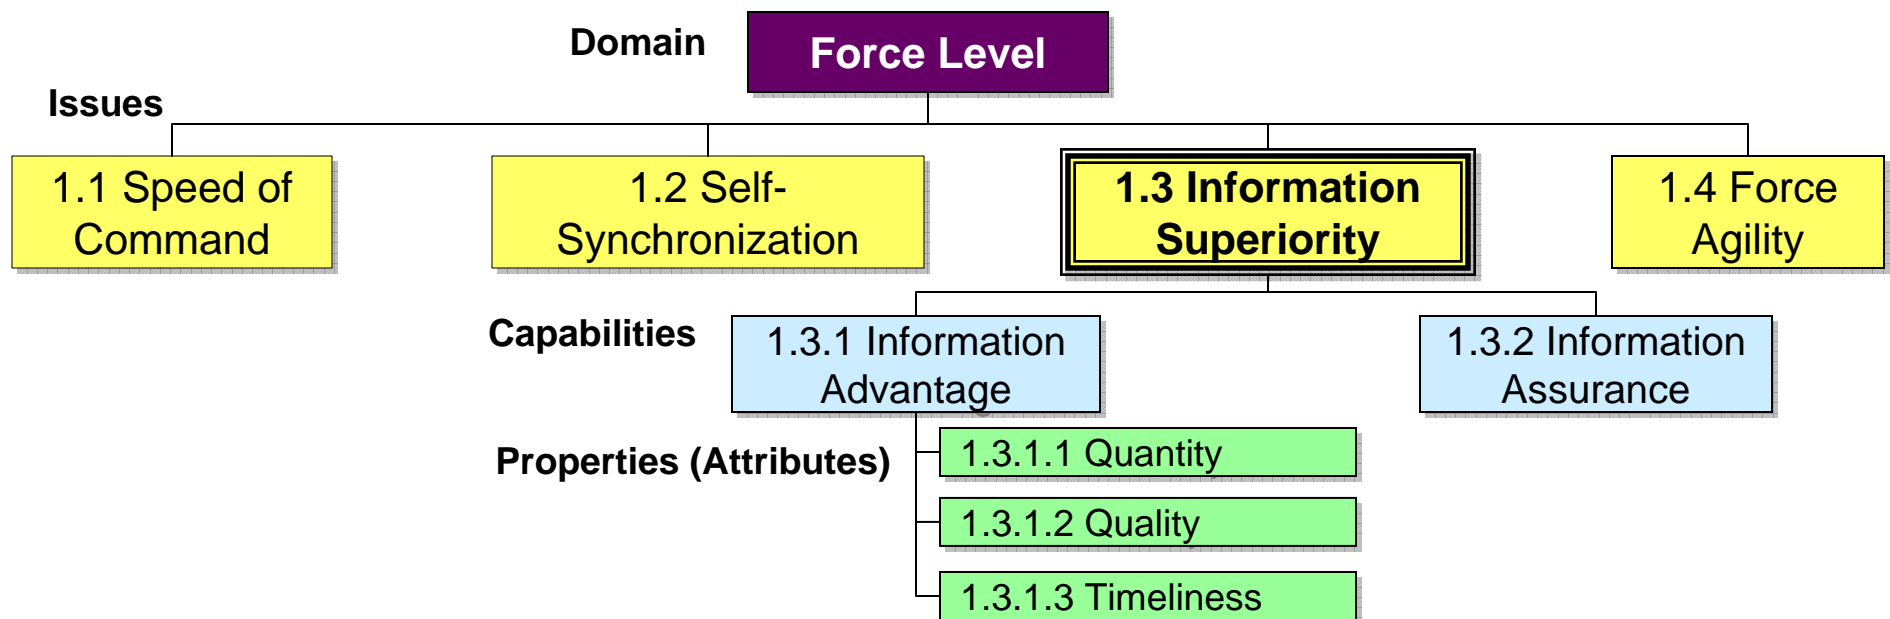

Definition of Force Level:

Demonstrated ability of net-enabled forces to achieve some degree of future force capability

Definition of Information Superiority:

- ❖ The operational advantage derived from the ability to collect, process, and disseminate an uninterrupted flow of information while exploiting or denying an adversary's ability to do the same. (FM 3-0)

UNCLASSIFIED

28

Definition of Force Level:

Demonstrated ability of net-enabled forces to achieve some degree of future force capability

- **Information Advantage:** The ability of one opponent to answer his information needs at a rate greater than his adversary can answer his information needs.
- **Information Assurance:** Measures that protect and defend information and information systems by ensuring their availability, integrity, authentication, confidentiality, and non-repudiation. This includes providing for restoration of information systems by incorporating protection, detection, and reaction capabilities.

UNCLASSIFIED

I-3 Information Superiority Measures

UNCLASSIFIED

UNCLASSIFIED

Force Agility

UNCLASSIFIED

31

ARMY TEST AND EVALUATION COMMAND

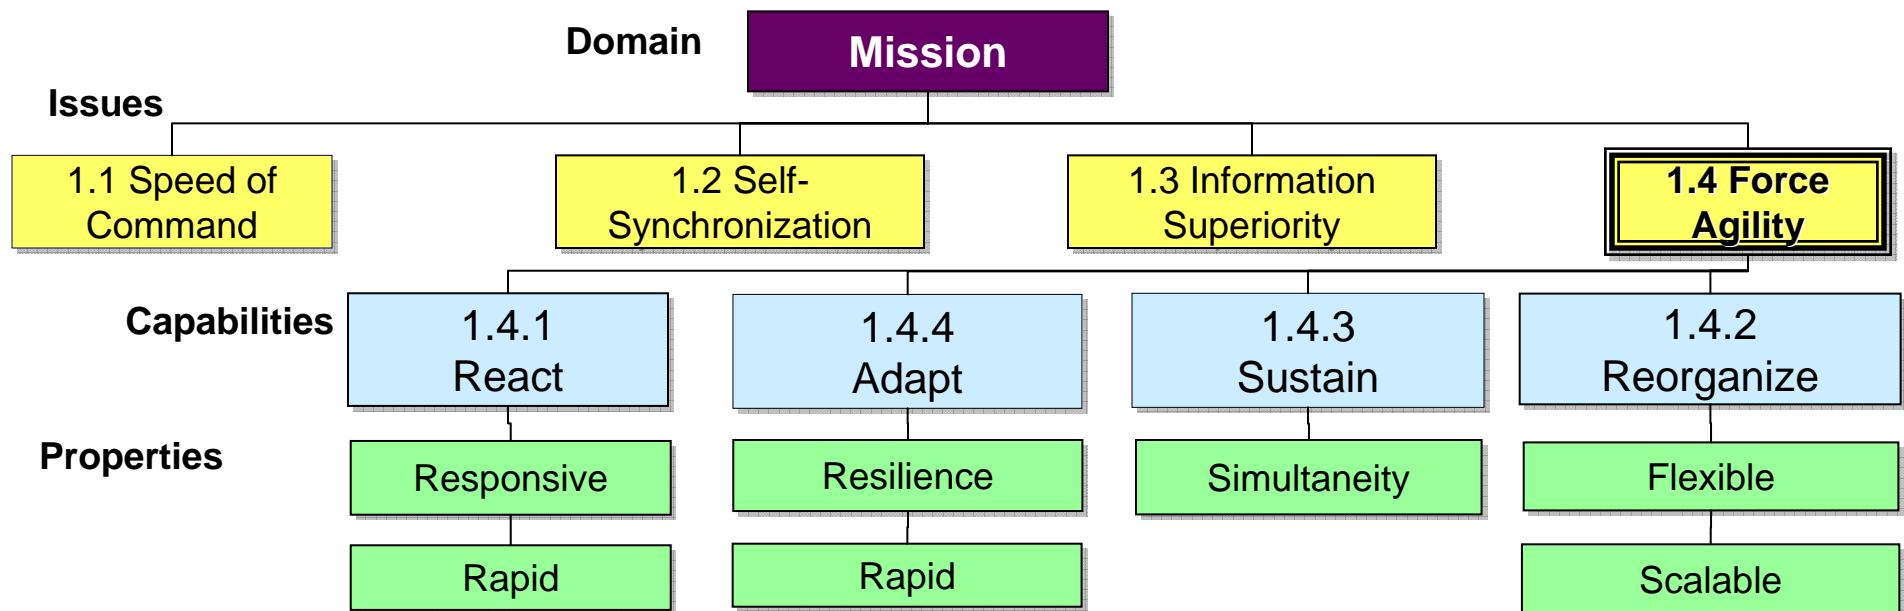

Definition of Mission:

Demonstrated ability of net-enabled forces to achieve some degree of future force capability

Force Agility

- ❖ A responsive, agile force package is one that is sustainable and mobile enough to accomplish the mission. (FM 3-0)
- ❖ Ability of a force to rapidly react to changing conditions, especially regarding unplanned and ad-hoc circumstances, and revise its organization to handle them; Ability to alter the nature of engagement quickly (adapt) and the ability to sustain several types of engagement simultaneously, as required.
- ❖ Agility implies an ability to change over time. (Ref: Network Centric Operations Conceptual Framework)

UNCLASSIFIED

32

Definition of Mission:

Demonstrated ability of net-enabled forces to achieve some degree of future force capability

Definitions of Force Agility Properties

Responsiveness

❖ The degree to which decisions and actions are timely and relevant. (*NCE JFC 1.0*) Responsiveness is a function of timeliness and relevance.

Resilient

❖ The extent to which recovery or adjustment is achieved given misfortune or change. (*NCE JFC 1.0*)

- ❖ Recovery – Reestablishment of the baseline prior to a given misfortune or change

Scalable

❖ The extent to which organizations can seamlessly adjust size and scope to meet a given mission requirement. (*NCE JFC 1.0*)

Simultaneity

❖ The extent to which engagements occur at the same moment (*Modified from Houghton Mifflin Company*)

Sustainment

❖ The extent to which an engagement maintains and prolongs operations or combat until successful accomplishment or revision of the mission. (Modified from CJCSI 3170.01E)

Flexible

❖ The extent to which individuals and organizations dynamically meet mission requirements. (*NCE JFC 1.0*) (*See Cognitive measures*)
